Off the Wall Products Wins Silver Medal in Work Zone Category *Roads & Bridges Magazine Honors Off the Wall with Prestigious Accolade*

Salt Lake City, UT—April 19, 2006—Roads & Bridges Magazine presented Off the Wall Products with the Silver Medal in the Work-Zone Safety category in the 1st Annual Roads & Bridges Contractors' Choice Awards for their Multi-Barrier Brand Longitudinal Channelizing Barricade.

Off the Wall was nominated and then confirmed as a finalist by a panel of judges from the American Road and Transportation Builders Association, the Association of Equipment Manufacturers, and the Association of General Contractors of America before they were entered on the ballot.

Ballots were sent to over 22,000 contractors who make up the readership of *Roads & Bridges Magazine*, and ballots were filled out through either an online survey or returned by mail.

Off the Wall's winning product for 2006 was the MB42x45 HDPE roadway and construction barricade. Easy to set up, this barricade is extremely stable when in place and weighs in at 760 lbs. when ballasted with water. It forms a tamper-proof inseparable wall in almost any configuration and is also compatible with lights, signage, stanchions, and fencing. It is most often ordered in orange, but is also attractive and highly visible when white and orange units are alternated in a wall configuration. It is approved by the FHWA as a Longitudinal Channelizing Barricade for speeds up to 65 mph and may therefore be used on highway construction projects.

To learn more about plastic water-filled barriers and barricades, visit www.offthewallproducts.com or call 801-363-7740 for more information.

Off the Wall Products is a Salt Lake City-based company that designs and manufactures heavy-duty plastic barriers and barricades for roadway, airport, military and commercial construction. Since 1989, the company has designed innovative safety products, such as easy-to-deploy water-filled barriers, barricades and other high-tech products, which reduce accidents, ensure motorist and worker safety and protect our armed forces.
